

Applying Social Value

Malcolm Hanna Sustainability Manager Real Assets

What is Social Value?

What is Social Value?

"Social value is the quantification of the relative importance that people place on the changes they experience in their lives". Social Value UK

Social Value asks the question: "If £1 is spent on the delivery of services, can that same £1 be used to also produce a wider benefit to the community?". *Salford Social Value*

For L&G it's about the **wider impacts** of our investments and developments, including economic returns, the wellbeing of individuals, communities, wider society and the environment

Why is this important to Legal & General?

Over and above being the right thing to do...

- Build trust, responsibility to be economically useful, whilst also delivering wider benefits to society
- 2. Attracting (the right) investment
- 3. Attracting and retaining employees

"While young workers believe that business should consider stakeholders' interests as well as profits, their experience is of employers prioritizing the bottom line above workers, society and the environment, leaving them with little sense of loyalty"
